

In-Yard Operations

Dedicated first mile, last mile services that protect you from rail network service disruptions so you can focus on production.

Cando Rail & Terminals provides dedicated in-yard rail services, connecting you to the Class 1 rail network faster and more efficiently.

Our Solutions

Our safe, flexible, integrated crews take care of all rail operations including rail switching, unit train assembly and safe, seamless railcar loading/unloading for smoother, more efficient plant operations. Our relationship with the Class 1 railways and ability to operate on their track create a virtual short line operation, extending your reach and optimizing your supply chain.

- Railcar switching
- Unit train assembly & air testing
- Transloading & loading/unloading services
- Material handling
- Warehouse operations
- Infrastructure design & development including track construction, maintenance & inspection programs
- Railcar fleet management including cleaning, repair & maintenance programs

As your partner, we provide:

Production Certainty

We are dedicated to our customers' in-yard rail services so our customers can focus on the things that really matter to them.

Extended Reach

Our trackage rights on Class 1 track creates a virtual short line operation and allows us to connect you to the Class 1 railway network faster, improving certainty of railcar supply.

Integrated Network

+40 in-yard locations coast-to-coast, integrated with our owned terminal network for additional capacity and supply chain efficiency

Leverage Our Deep Industry Experience

We operate at more than 40 customer-owned refineries, mines, mills, plants, and railyards. With decades of rail supply chain experience, we leverage our expertise in:

- Energy & Chemicals
- Fertilizer & Potash
- Forest Products
- Material handling
- Automotive
- Grain & Grain Products
- Intermodal
- Railways/Class 1s

Our Promise

Commitment to Safety

Customized on-site solutions with the ability to integrate services

Close working relationships with Class 1 railways

Creative solutions and operational partnerships between customers and the Class 1 railways

Cando crews work as an extension of your site operations teams to provide custom switching and rail services along with:

Improved Safety Performance

Improved safety on and around rail tracks

Production Certainty

Customized on-site solutions, integrated services

Improved operating efficiencies = increased carload volume = increased revenue

Improved Utilization

Increased efficiency of railcar movements = less bottlenecking

Improved utilization of railcar fleet = decreased cycle time = decreased fleet costs

Cost Savings

Reduction in demurrage charges

Reduction in labour

Reduction in training and safety costs

Elimination of equipment, maintenance, and fuel expenses
