ITEM 300 – General Application of Demurrage and Storage

Demurrage is a charge for detaining a railcar. Railroads charge demurrage as an incentive for Customers to load and unload railcars promptly, to prevent congestion in railroad terminals caused by idle railcars, and ultimately to improve the utilization of a valuable asset.

Storage is a charge for holding excess railcars under contract or agreement with zero rated carhire. If cars are stored on the SVT and a contract or agreement is not in place or is no longer applicable, tariff charges will apply.

This publication takes precedence over any other domestic, interstate, intrastate, export or import publication, containing rules, regulations and charges on demurrage and storage for the account of SVT, and will be applied by SVT to the receiving party served by SVT and the receiving party will be responsible for payment of such charges.

*Note 1: Charges **will apply** on the effective date of this tariff against all railcars on the SVT.*

*Note 2: Charges **will not apply** against private railcars while held on private tracks.*

ITEM 305 – Notification to Customer

Email notification of railcars held on SVT under constructive placement will be furnished to the email address or addresses provided by the receiving party served by the SVT. Notification sent to email address provided will be considered as having been received. Should SVT receive a failure to deliver message due to any reason attributable to the receiver, such as invalid email address, notice will be considered to have been given on any Constructive Placement notice attempted to deliver.

Constructive placement notification occurs when due to any condition attributable to the receiving party served by the SVT which prevents SVT from making actual placement.

Actual placement of railcar(s) upon tracks of receiving party served by SVT will constitute notice.

All dates and times of constructive and actual placement by the train crew's record will govern the chargeable time as described in this tariff. The receiving party served by SVT must review and report discrepancies between receiving party's inventory and SVT reported inventory within twenty-four (24) hours of discrepancy to the SVT Customer Service email address found on page 2 of this tariff. If communication is not received within twenty-four (24) hours, the train crew's record will govern for application of charges. For daily SVT inventory report, please make request to Customer service email address on page 2 of this tariff.

ITEM 310 – Notification to SVT

The SVT will accept forwarding instructions, empty release information, or other disposition twenty-four (24) hours via EDI and via SVT Webtool (ARMS).

Forwarding instructions, empty release or other disposition that is requested via email is subject to charges listed in publication SVT 9000.

Note 1: Demurrage Charges will continue to accrue to the origin industry even when railcars are released to a Third-Party, until the time billing is received by SVT from the Third-Party (see Item 110).

Note 2: It is the origin industry's responsibility to ensure information is received by all railroads, including SVT. Charges for railcars released without proper billing are subject to Item 110.

Note 3: A charge will be assessed on railcars released prior to being fully unloaded or loaded (see Item 115).
